## AUSTINS FERRY PRIMARY SCHOOL

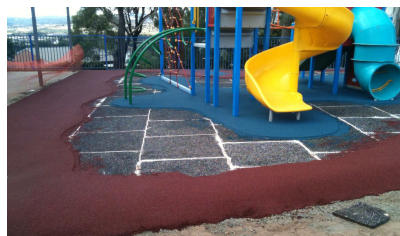

Austins Ferry and Windermere Primary Schools are new schools opened in 2011 in the south of the State to cater for the merging of Abbotsfield, Claremont, Mt Faulkner and Roseneath Primary Schools

Austins Ferry is located on the old Roseneath Primary School site in Claremont and has 3 new play areas with play structures catering for 3 different user age groups of students.

## PUNCHBOWL PRIMARY SCHOOL

Photos of a recently installed play structure showing the rubber undersurfacing being laid onto the shock pads and the finished product.

## PRODUCT INFORMATION

Visit our website for pictures and information on our complete range and contact us for a price or more information on any of our products.

## SOFTFALL

If you have trouble visualising how much is in a semi load of certified organic hardwood softfall, this photo shows 3 semi loads or approx. 225m3.

With the changing face of forestry and mills closing in Tasmania, our hardwood softfall is becoming harder to obtain. At this stage we still have reasonable access to supplies in the south, but limited access in the northern part of the State. Of course this can change at any time.

Rubber undersurfacing is an alternative and it is possible for schools and councils to 'do it yourself' in small areas such as under swings, end of slides, base of poles, etc. We can provide all instructions for installation.

We strongly advise that larger areas are performed by our contractors to make sure standards are met.
